Stevenage Circuits Purchase Orbotech LDI System

Issue 9 Date: 12/08/09

Stevenage Circuits have purchased a Paragon 8800i Laser Direct Imaging System from Orbotech. The first of its kind in the UK it replaces the first gas laser LDI system installed at Stevenage in 1999 and is in addition to the current DP-100SL solid state laser system installed in 2003. The Paragon 8800i is capable of imaging 25 micron line & space and is equipped with a high power 8w laser enabling Stevenage to use standard plating resist instead of LDI resist without loss of output.

Multiple Sales of Orbotech Inkjet Systems

We are pleased to announce multiple sales of inkjet legend systems from Orbotech.

Exception PCB and Lyncolec in UK and Print Production in Denmark have all selected Orbotech's proven inkjet systems for printing legend and saving money on conventional screen print process.

Using patented UCI Technology™, Orbotech inkjet legend printers allow printing and curing on the same system, saving valuable production time and costs, and increasing yields. No ink is wasted before, during or after the printing process, resulting in the lowest cost of ink per print.
