Orbotech Launch New Inkjet Legend Printer

Issue 9 Date: 03/02/09

Orbotech have introduced their new Sprint-8 Inkjet Legend Printer for the PCB industry. With new high performance print heads and unique UCI Technology (UV Curing Integrated), Sprint-8 delivers the highest quality legend imaging with ultra-fast speed at the lowest cost of ink per print for all PCB applications. With a typical return on investment of less than one year this will have a major impact on operational costs as well as cutting delivery times by shrinking time consuming and expensive processes into one easy step.

Peplertech Ltd—Who are we?

Peplertech specialise in the supply of production equipment and software to the PCB industry. We are agents for some of the worlds leading OEMs providing solutions in AOI, Imaging, CAM, Drilling, Electrical Test and Press systems. For more info visit www.peplertech.co.uk or call us on +44 1625 861443

Wrekin Circuits Purchase Orbotech Inkjet Legend Printer

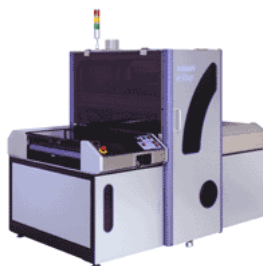

Wrekin Circuits have purchased an Inkjet Legend Printer from Orbotech for their fast turn around production of PCBs.

Using their unique UCI Technology™, Orbotech inkjet legend printers allow printing and curing on the same system, saving valuable production time and costs, and increasing yields. No ink is wasted before, during or after the printing process, resulting in the lowest cost of ink per print.

This investment continues a long term relationship between Wrekin and Orbotech.
