### Multiple Sales of Orbotech Inkjet Systems

Issue 12 Date: 14/09/10

Merlin Circuit Technology and Zot Engineering have both purchased Orbotech's proven Sprint-8 inkjet system for legend printing.

Using its unique UCI Technology™ (UV Curing Integrated), Sprint-8 delivers the highest quality legend imaging with fast speed at the lowest cost of ink per print, saving valuable production time and costs, and increasing yields. No ink is wasted before, during or after the printing process.

### Graphic Purchase InCAM from Orbotech

Graphic Plc have purchase multiple seats of InCAM software from Orbotech after extensive testing and evaluation.

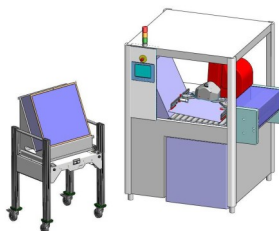

InCAM has saved many hours of work by speeding up processes involved in tooling. A 38 layer PCB which previously took 216 hours for clean up using Genesis took only 2 hours with InCAM .
